

Rapport de scoring CIN 88710263

Contexte

- Client analyse: `88710263`
- Analyse consolidee via modeles classique, sequentiel et graphe.

Observations

Modele	Default proba	Risk level	KYC
Classique	0.0003	FAIBLE	49.73
Sequentiel	0.7206	ELEVE	49.73
Graphe	0.9826	ELEVE	49.73

- Classique: proba=0.0003 | risque=FAIBLE | kyc=49.73 | model=Logistic Regression
- Sequentiel: proba=0.7206 | risque=ELEVE | kyc=49.73 | model=GRU baseline (GRU)
- Graphe: proba=0.9826 | risque=ELEVE | kyc=49.73 | model=GraphSAGE

Risques

- Niveau consolide oriente par le pire cas sequentiel: `ELEVE` (proba=0.7206).
- Verifier la coherence entre risque transactionnel et risque reseau.

Recommandation

- Decision proposee: revue manuelle si risque `MODERE/ELEVE`, sinon validation sous surveillance.
- Actions: controle KYC, suivi retards, monitoring relationnel.

References

- `knowledge\_base\ref08\_extrait.txt#0` (score=0.386)
- `criteres\_score\_et\_crispdm.md#0` (score=0.077)
- `criteres\_score\_et\_crispdm.md#2` (score=0.074)
- `criteres\_score\_et\_crispdm.md#1` (score=0.049)
- `lstm\_gru\_next\_steps.md#0` (score=0.040)

Disclaimer

- Document a vocation pedagogique / demonstration (donnees synthetiques).
- Les scores et recommandations ne remplacent pas une decision humaine ni une validation conforme r
- Pas de conseil juridique ou reglementaire.
